

Curved Pipe Liner

Curved Pipe **wear ceramic Liner**,also named pipe tile liner,because it mainly used for ash, coal, powder handling pipe system.

Several curved tile liner compose circle pipe liner.which is different with alumina ceramic plain tile.

Chemshun Curved Tile Liner Size Includes :

- 150*53*13 mm with 8 degree
- 140*10*12.7 with three holes for welding

Detailed Introduction:

Apart from the standard alumina ceramic tile ,Curved Pipe [wear ceramic Liner](#),we can also manufacturer the pre-engineering ceramics to suit different equipment.

We have our technical team who can help the client to choose the suitable wear resistant ceramic products ,and also we have the ability to design and make the CAD drawings according to the client's wear application.

The Tailor-made ceramics had the advantage of low wear, high hardness and impact resistant face, it widely used for the chutes, hoppers, bunkers, pipelines in the mining, power generation, steel plant, steel plant industries, it make cost effective performance and reduce the maintenance cost and down-time for the clients.
